UNITED PUMP CASE STUDY

JACKSON COUNTY SCHOOL SYSTEM

Ensuring Compliance & Peace of Mind through SiteWatch® Total Compliance

BACKGROUND

Located sixty miles northeast of Atlanta, the Jackson County School System serves more than 11,000 students in one of the fastest-growing counties in the United States.

To support this growth, a fleet of 186 buses logs over 1.5 million miles annually, transporting students to thirteen different schools. Maintaining this scale of operation requires constant logistical oversight and a highly reliable fueling infrastructure.

CHALLENGE

Keeping such a large fleet on the move requires constant tracking of fuel consumption and equipment maintenance.

The district faced several hurdles in their daily operations:

- **Manual Logistics:** Monitoring fuel levels was a time-consuming, imprecise process involving manual "stick" measurements.
- **Aging Infrastructure:** Maintenance of the district's 30-year-old tanks and pumps was increasingly difficult to manage.
- **Administrative Burden:** The department was strained by onerous state requirements, including inspections, recordkeeping, and managing operator certifications.

SITEWATCH from UNITED PUMP

"United Pump's services are a lifesaver! I encourage everyone I can to look into them."

Duane Peterson
Transportation Director

JACKSON COUNTY SCHOOL SYSTEM

SOLUTION

To modernize operations, Transportation Director Duane Peterson partnered with United Pump to implement the FuelMaster automated tracking system.

To further reduce the administrative burden of compliance management, JCSS also adopted United Pump's comprehensive **SiteWatch®** program, designating United Pump to oversee the district's regulatory and maintenance needs.

United Pump's Deliverables:

- **Automated Fuel Tracking:** Implementation of FuelMaster for daily reporting and low-level alerts.
- **Compliance Management:** Full oversight of A/B operator certifications and triennial on-site audits.
- **Proactive Maintenance:** Regular system inspections and remote station walk-throughs.

RESULTS

The partnership has streamlined fuel management and ensured the district stays ahead of potential equipment failures.

- **Administrative Savings:** SiteWatch® handles all recordkeeping and state registrations, removing the compliance burden from district staff.
- **Operational Efficiency:** Automated tracking eliminated manual "stick" measurements, reducing unnecessary labor and improving data accuracy.
- **Rapid Response:** United Pump provides emergency repairs within hours and schedules non-emergency maintenance to avoid disrupting bus schedules.

WHAT IS SITEWATCH®?

Is compliance causing you headaches? Are you tired of keeping up with ATG Compliance Reports? Do you cringe at the thought of an EPD Compliance Inspection? Or do you simply not have the time to keep up with all of this on top of all your other responsibilities?

If you answered "Yes" to any of these questions, United Pump has the solution for you. SiteWatch® services provide scheduled, preventive maintenance and compliance management for fueling operations, large and small.
